

NORTHWIND

Investor Deck — 2026 Product Launch

AGENDA

What we'll cover

01 **The Problem**
The daily cost of manual operations

02 **The Market**
A large, underserved category

03 **The Product**
The Northwind automation platform

04 **Business Model**
Pricing and unit economics

05 **Go-to-Market**
How we reach and win customers

06 **The Traction**
Four quarters of growth

07 **Team & Ask**
Who we are and what we need

The Problem

The daily cost of manual operations

01

THE PROBLEM

Operations run on heroic effort

Fragmented handoffs

Work bounces between email, spreadsheets, and chat. Every handoff is a chance to drop context or delay a customer.

Invisible work

Nobody can see how long a process actually takes, so nothing gets measured — and nothing gets fixed.

Re-keying errors

The same data is typed into three systems. Errors compound quietly until they surface as billing disputes or missed SLAs.

The result: operations scale by **adding headcount, not leverage**. Every new customer means more manual work — **margins get worse as revenue grows.**

THE PROBLEM

Manual operations are a hidden tax

4.2h

Lost every day per operations team to manual handoffs and re-keying

63%

Of recurring ops workflows are still executed fully by hand

\$38k

Average annual cost per team in lost productivity and rework

Illustrative figures from Northwind discovery interviews with 42 ops teams, 2025.

THE PROBLEM

The cost of the status quo

What manual operations really cost a mid-size team every year.

COST DRIVER	PER TEAM / YEAR	PER 10 TEAMS
Re-keying data between systems	\$14,200	\$142,000
Chasing status across tools	\$11,600	\$116,000
Rework from handoff errors	\$8,900	\$89,000
Audit and compliance prep	\$3,300	\$33,000

Total: **\$38k per team, every year** — before counting lost deals and churn.

THE PROBLEM

Who feels the pain

Maya K. — Ops Manager

Series B fintech, team of 9

-
- Spends Mondays reconciling three systems by hand
 - Can't answer 'where is this request?' without asking around
 - Audit prep eats two full weeks every quarter

Daniel R. — RevOps Lead

B2B marketplace, team of 14

-
- Owns 40+ recurring processes documented in scattered docs
 - New hires take 6 weeks to run workflows unsupervised
 - Tool stack grew 3× in two years; nothing talks to anything

The Market

A large, underserved category

02

THE MARKET

A large, expanding market

TAM

\$42B

Global operations software spend, 2026

SAM

\$8.5B

Workflow automation for mid-market operations teams

SOM

\$640M

Segment Northwind can realistically serve within three years

Illustrative market sizing built from bottom-up account counts and seat pricing.

Three trends working in our favor

01

Ops tooling consolidation

Teams are cutting 10–15 point tools down to a few platforms. Budgets move from apps to systems of action.

02

AI moved from demo to duty

Buyers now expect automation to do real work, not generate suggestions. Reliability and auditability became the bar.

03

Compliance went mainstream

SOC2 and GDPR demands used to be enterprise-only. Now a 50-person vendor gets the same security questionnaire.

THE MARKET

Why now

The integration layer is solved

Modern APIs and iPaaS plumbing mean a small team can now connect the entire mid-market stack — impossible five years ago.

Budgets shifted to efficiency

Post-2023, every ops leader owns a 'do more with less' mandate. Automation is now a board-level line item, not a nice-to-have.

Incumbents left the mid-market

Legacy suites moved upmarket with \$250k+ deals. Teams of 5–50 are underserved, over-tooled, and ready to switch.

The window is open now. **Category leaders are crowned in the first 36 months.**

The Product

The Northwind automation platform

03

THE PRODUCT

Run operations on autopilot

- **Visual pipeline builder** — turn manual SOPs into automated workflows, no code required.
- **200+ integrations** — connect the CRM, billing, and ticketing tools your team already runs on.
- **Human-in-the-loop controls** — approvals, thresholds, and guardrails exactly where they matter.
- **Audit trail by default** — every run logged, searchable, and exportable for compliance.

THE PRODUCT

How it works

1

Connect

Link your CRM, billing, ticketing, and data tools in minutes with pre-built connectors — no engineering ticket required.

2

Build

Drag steps onto a canvas: fetch, transform, approve, notify. Every pipeline is versioned like code.

3

Automate

Run on schedule or on events. Watch runs live, get alerted on failures, and export a full audit trail.

Median time from signup to first live workflow: **47 minutes.**

THE PRODUCT

Built for operations teams

■ Visual Pipelines

Drag-and-drop builder that turns SOPs into executable workflows — no engineers required.

■ One-click Deploy

Ship a new workflow to production in seconds, with full versioning and instant rollback.

■ Realtime Metrics

Live dashboards for run volume, failure rates, and hours saved — per workflow, per team.

■ SOC2 by default

Type II controls, SSO/SAML, and immutable audit logging baked into every plan.

FEATURE 01

Visual Pipelines

- **Canvas, not code** — ops leaders build and own their workflows directly.
- **60+ step types** — fetch, transform, branch, approve, notify, and call any API.
- **Versioned like software** — every change tracked; diff, review, and roll back safely.

60+

step types available out of the box, no custom code needed

PIPELINE CANVAS

FEATURE 02

One-click Deploy

- **From draft to live in seconds** — no CI pipelines, no release windows, no DevOps queue.
- **Instant rollback** — one click restores any previous version, mid-incident.
- **Safe by design** — shadow-run a new version against live traffic before switching.

9 sec

median time from clicking deploy to a version serving live traffic

DEPLOY LOG

v2.4.1
invoice-sync

LIVE

v2.4.0
invoice-sync

ROLLED BACK

v2.3.8
lead-router

LIVE

v2.3.7
lead-router

ARCHIVED

FEATURE 03

Realtime Metrics

- **Every run, visible** — volume, latency, and failure rates stream in live.
- **Proof of value built in** — hours saved are computed automatically per workflow.
- **Alerts that matter** — route failures to Slack or email with full run context.

99.2%

median workflow success rate across all customer accounts

LIVE DASHBOARD

12,418

Runs today

99.2%

Success rate

3.1h

Hours saved

17

Failed runs

FEATURE 04

SOC2 by default

- **Not an add-on** — security controls ship in every plan, including self-serve.
- **Immutable audit log** — every action recorded, tamper-evident, exportable.
- **Enterprise identity** — SSO/SAML and SCIM provisioning from day one.

2 wks

typical security review time saved per enterprise deal

COMPLIANCE POSTURE

SOC2 TYPE II

GDPR READY

ISO 27001*

SSO / SAML

*ISO 27001 certification in progress, expected Q1 2027.

THE PRODUCT

How the platform fits together

SOURCES

NORTHWIND CORE

DESTINATIONS

Simplified view. Event-driven runtime; 99.95% uptime SLA on Enterprise plans.

THE PRODUCT

Security and compliance

■ Encryption everywhere

TLS 1.3 in transit, AES-256 at rest, per-customer keys on Enterprise.

■ Least-privilege access

Role-based permissions down to a single workflow; SCIM deprovisioning.

■ Regional data residency

US region live; Frankfurt region ships Q4 2026 for EU customers.

■ Continuous assurance

Annual penetration tests, 24/7 monitoring, public status page.

THE PRODUCT

Connects to the stack you already run

Salesforce

HubSpot

Stripe

Zendesk

Slack

Jira

NetSuite

Snowflake

Shopify

Intercom

Workday

SAP

...and 190+ more. Plus a **REST API** and **webhooks** for anything custom.

Trademarks belong to their respective owners; integration list illustrative.

Business Model

Pricing and unit economics

04

BUSINESS MODEL

Simple pricing that scales with usage

STARTER

\$490

/ month

- Up to 5 workflows
- 2,000 runs / month
- Core integrations
- Community support

GROWTH

\$1,900

/ month

- Unlimited workflows
- 25,000 runs / month
- Realtime metrics & alerts
- Priority support

ENTERPRISE

Custom

annual contract

- SSO/SAML & SCIM
- Audit log export
- 99.95% uptime SLA
- Dedicated CSM

Illustrative pricing. Usage-based overages apply above included run volumes.

BUSINESS MODEL

Unit economics that compound

\$4.8k

Blended CAC per new customer

\$58k

LTV on a 3-year horizon

12x

LTV to CAC ratio

7 mo

Median CAC payback period

Gross margin trajectory

2026: 71%

2027 plan: 78%

Margin expands as workflow run volume amortizes fixed infrastructure and self-serve onboarding lowers cost to serve.

Illustrative unit economics based on FY2026 plan assumptions.

Go-to-Market

How we reach and win customers

05

GO-TO-MARKET

Land self-serve, expand with sales

PHASE 1

Product-led self-serve

2026

Free tier drives trials; ops leaders automate their first workflow in under an hour and invite their team.

PHASE 2

Inside sales assist

2026–2027

Sales team converts high-usage accounts, expands seats, and lands first mid-market contracts.

PHASE 3

Enterprise motion

2027

Dedicated AEs, security-first selling, and multi-year deals with regional data residency.

One funnel, three motions: **the same product** carries a customer from a free trial to an enterprise contract — **no re-platforming, ever.**

A funnel we can measure end to end

Illustrative monthly funnel, Q4 2026 plan. Bar widths schematic, not to scale.

How we win

ALTERNATIVE	WHERE IT FALLS SHORT	NORTHWIND'S EDGE
Legacy automation suites	Six-figure contracts, 6-month implementations, built for IT departments	Live in days, priced for teams of 5–50, owned by ops
Point tools & scripts	One workflow each; invisible to the rest of the org; breaks silently	One platform, shared visibility, alerting and audit built in
Build in-house	Pulls engineers off the roadmap; the expert leaves, the workflow dies	Ops self-serves; engineers get their roadmap back

Win rate in competitive deals this year: **61%** — most often against "do nothing."

The Traction

Four quarters of compounding growth

06

THE TRACTION

2026, quarter by quarter

METRIC	Q1 2026	Q2 2026	Q3 2026	Q4 2026
ARR	\$1.2M	\$2.1M	\$3.6M	\$5.8M
Customers	18	34	57	92
NRR	108%	114%	121%	127%
Headcount	14	19	26	34

Illustrative plan figures for FY2026; NRR measured on trailing twelve-month cohort.

THE TRACTION

ARR is compounding

ARR grew **4.8× year to date** — driven by seat expansion inside existing accounts.

THE TRACTION

Customers across four industries

Helio Freight

Cobalt Bank

Meridian Health

Vantage Robotics

Alto Insurance

Brightline Retail

Nimbus Air

Ferrous Metals

92

Paying customers across logistics, fintech, and health

Customer names are illustrative placeholders.

127%

Net revenue retention — accounts expand without being sold

6 wks

Median time from first login to company-wide rollout

THE TRACTION

What a rollout looks like

CASE STUDY — HELIO FREIGHT (ILLUSTRATIVE)

A 40-person ops team stopped scaling headcount

Helio Freight, a mid-market logistics company, ran shipment exceptions, carrier billing, and customer notifications across email and spreadsheets.

In week one, they connected their TMS and billing tools and automated the three highest-volume workflows. By week six, 80% of exception handling ran without human touch — with every action logged for their compliance team.

Planned ops hires for 2026 were cut from 8 to 3, while shipment volume grew 30%.

-48%

ops overhead per shipment

6 wks

to full rollout

5

hires avoided in 2026

“

Northwind cut our ops overhead by half in six weeks.

—

COO, Series B fintech

Team & Ask

Who we are and what we need

07

TEAM & ASK

Built by operators, for operators

AK

Anna Kowalski

Co-founder & CEO

Ex-Stripe ops tooling lead; scaled support ops 20→200 people.

JM

Jonas Meyer

Co-founder & CTO

Ex-Datadog staff engineer; built workflow infra at planetary scale.

PS

Priya Shah

VP Product

Ex-Asana; shipped automation features used by 100k+ teams.

TW

Tom Wright

Advisor

Former COO, two exits; wrote the playbook on mid-market ops.

ROADMAP

The road ahead

Q1

Beta

Private beta live with 12 design partners; weekly release cadence.

Q2

GA

General availability with self-serve onboarding and usage-based pricing.

Q3

Enterprise tier

SSO/SAML, audit logs, and dedicated support for larger teams.

Q4

EU expansion

Frankfurt data region and GDPR-ready data processing terms.

TEAM & ASK

The ask

\$12M

Series A to scale GTM and the platform

This round funds 18 months of runway to reach **\$14M ARR** and 250+ customers by mid-2028.

Milestones: EU region live, enterprise motion proven with 10+ six-figure deals, and the integration catalog doubled to 400+.

USE OF FUNDS

All figures illustrative for a fictional company.

Let's talk.
