STORAGE

AGENDA

What we will cover

01

The business

Who we are, what we operate, and the market we serve

02

The numbers

FY2025 revenue, growth and unit economics

03

The product

Northwind Pulse — platform tour and roadmap

04

Why now

The outlook for 2026 and how to work with us

THE BUSINESS

Northwind Labs at a glance

1,284

turbines & arrays monitored

4.1 GW

capacity under management

14

markets across EU & North
America

212

people in Oslo, Berlin &
Chicago

Founded 2016 · Independent power producers, utilities and O&M providers run their fleets on Northwind Pulse.

THE BUSINESS

What we do

One data layer for mixed renewable fleets

- SCADA, sensor and grid data ingested every 10 seconds
- Anomaly detection flags underperformance weeks before failure
- Production forecasts tuned per site, per turbine model
- Compliance and availability reporting generated automatically

Why operators switch

Fleets on Northwind Pulse recover an average of 3.8% of lost production in the first year — mostly from faults that legacy monitoring never surfaced.

THE BUSINESS

A market that keeps compounding

€9.2B by 2028

Renewable asset-management software spend, growing ~14% per year as fleets age and digitize.

61% still on legacy

Most fleets above 50 MW run on fragmented SCADA exports and spreadsheets — our replacement wedge.

2.4× data growth

Sensor density per MW has more than doubled since 2021 — operators need tooling built for this volume.

Sources: company analysis of public tender data and customer interviews, Q1 2026.

THE BUSINESS

Who we serve

Anchor customers

Meridian Renewables, Kaskade Energy, Bluefjord Vind, Helios Grid Partners and 38 other operators across 14 markets.

Three segments, one platform

- Independent power producers — portfolio-wide performance
- Utilities — regulated reporting and grid compliance
- O&M providers — white-label monitoring for their clients
- Average contract: €212K ARR across 3.2 sites

THE NUMBERS

FY2025 scoreboard

€18.4M

ARR, up 42% YoY

118%

net revenue retention

71%

gross margin

87

fleet customers, +19 in
FY25

Audited figures, fiscal year ending December 2025.

Quarterly revenue by segment (€K)

Quarter	Wind	Solar	Storage	Total
Q1 FY25	2,140	980	310	3,430
Q2 FY25	2,460	1,150	420	4,030
Q3 FY25	2,720	1,390	560	4,670
Q4 FY25	3,050	1,620	740	5,410
FY25 total	10,370	5,140	2,030	17,540
FY24 total	7,610	3,420	1,180	12,210

THE NUMBERS

Quality of the growth

What sits behind the numbers

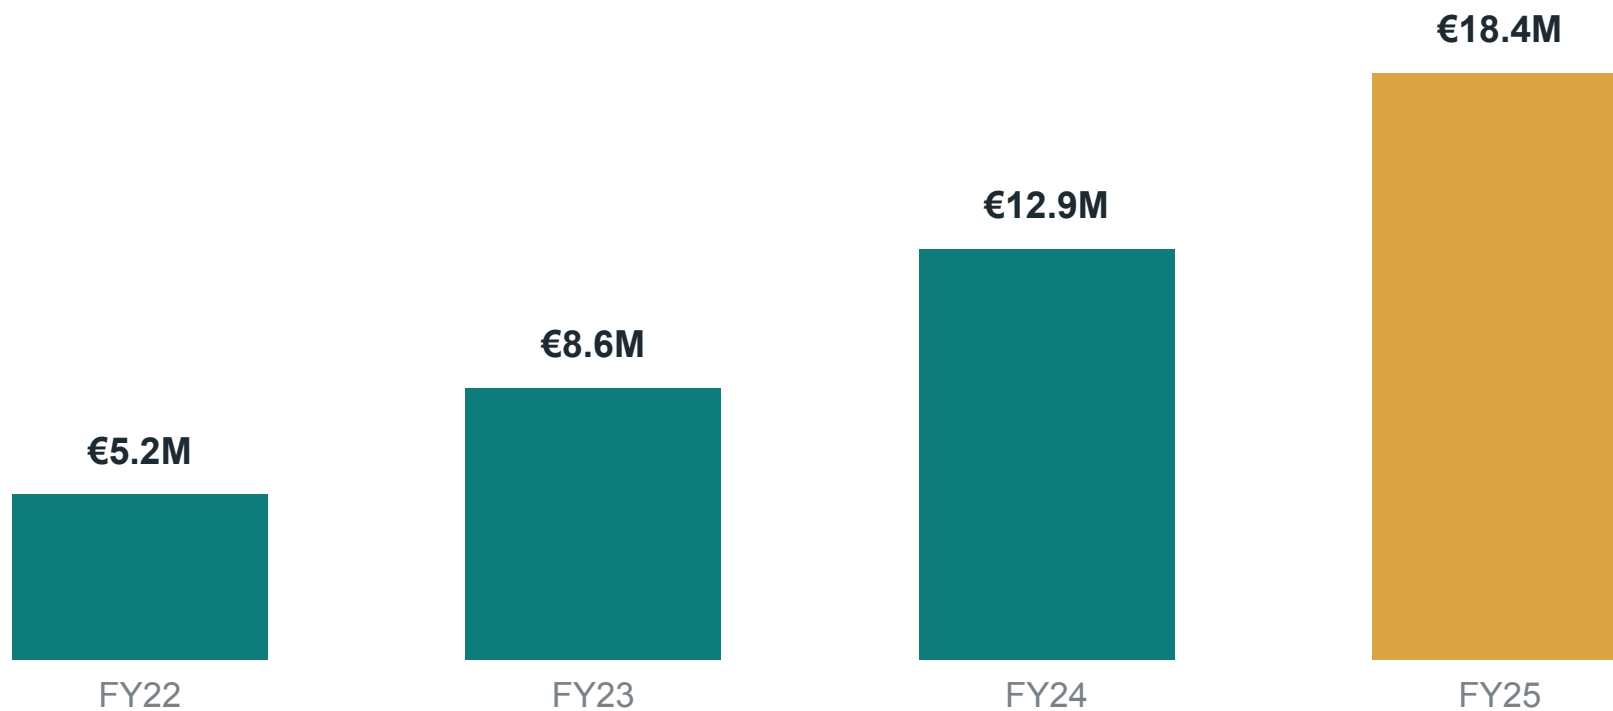

- Storage segment grew 72% — fastest-growing line
- Expansion revenue drove 58% of net new ARR
- Logo churn held at 4.1%, all sub-€50K accounts
- CAC payback steady at 13 months

Unit economics

Average contract €212K ARR · 71% gross margin · 13-month CAC payback. Every cohort since 2021 has turned contribution-positive within 18 months.

THE NUMBERS

Four years of compounding

Annual recurring revenue, year-end. FY25 mix: 59% wind · 29% solar · 12% storage.

THE PRODUCT

Northwind Pulse — three layers

Pulse Edge

On-site collectors that normalize SCADA, vibration and met-mast feeds — even over intermittent links.

Pulse Cloud

Fleet analytics: anomaly detection, production forecasting and automated availability reporting.

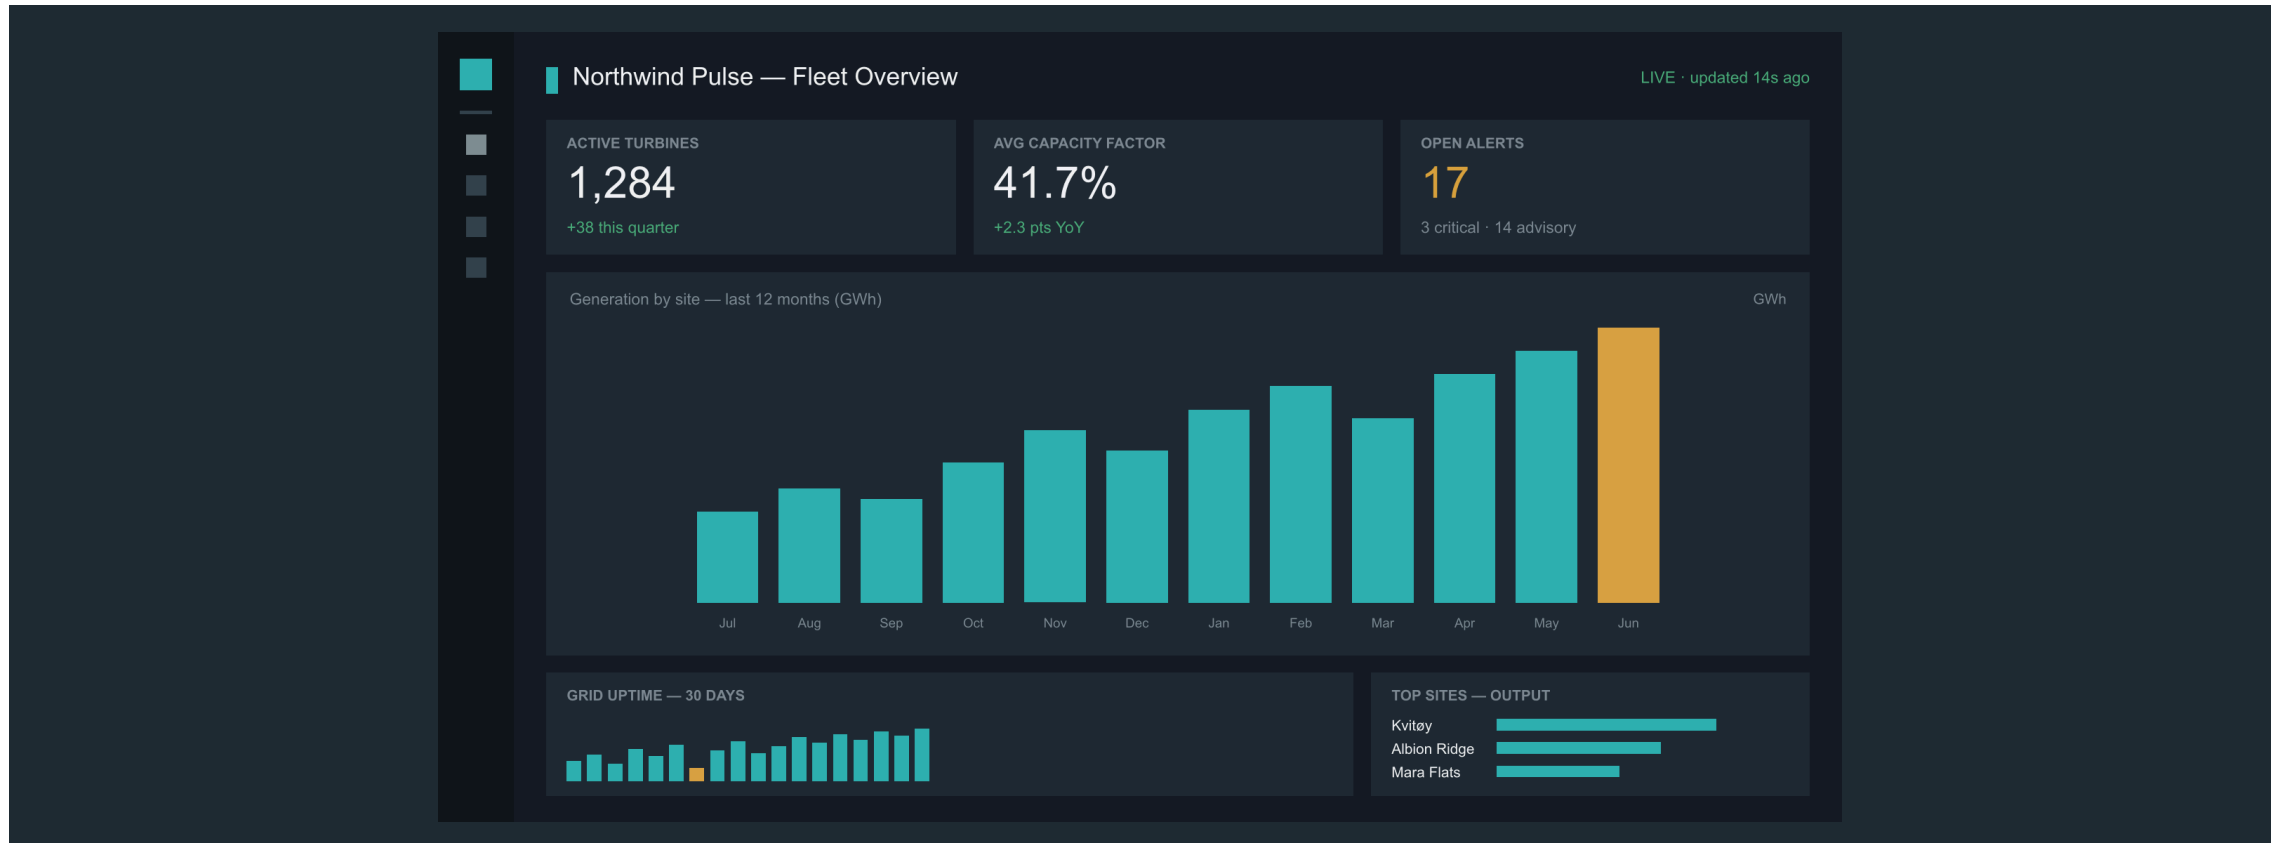

Pulse API

Every metric, alert and forecast over a versioned API — feeds trading desks, ERP and BI stacks.

Deployed at 1,284 sites; median time from contract to live data is 11 days.

THE PRODUCT

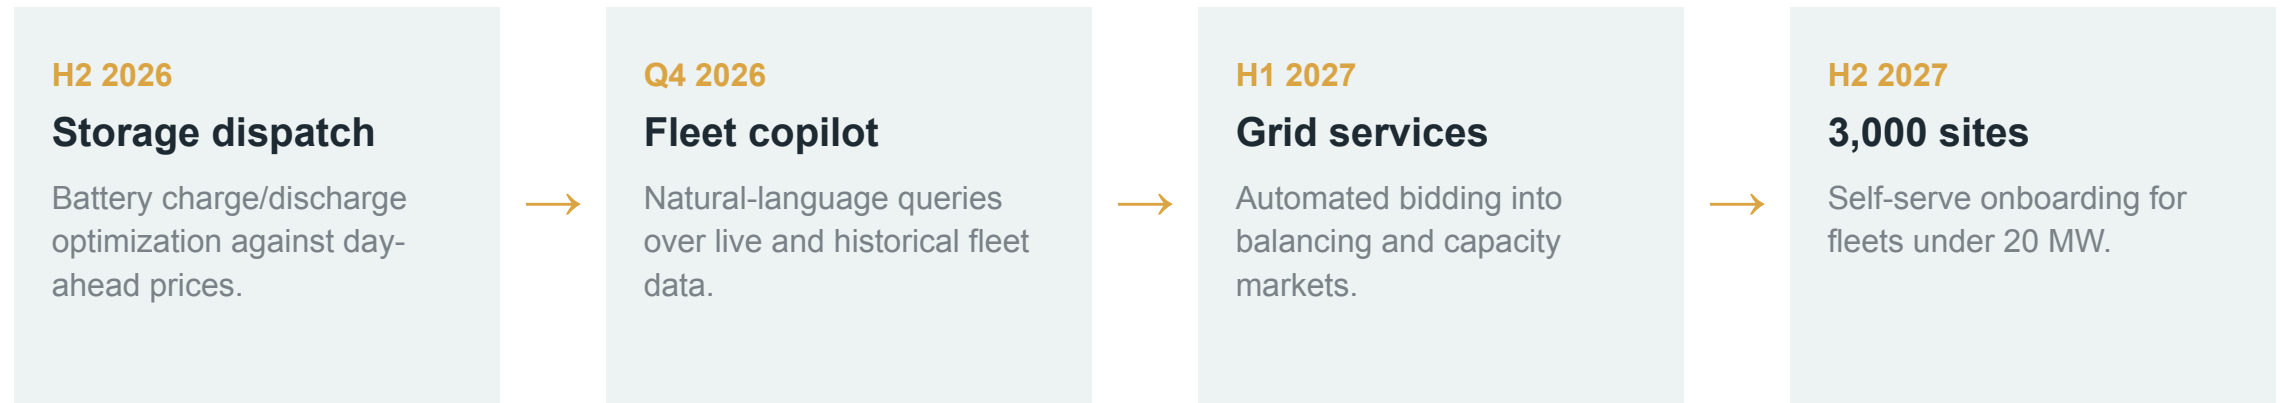

Inside the operations view

Northwind Pulse fleet overview — live generation, alerts and uptime across a 1,284-asset portfolio.

THE PRODUCT

Roadmap to 2027

Shipped on a 6-week release train; every feature above is already in private preview with anchor customers.

OUTLOOK

Why now

The window is open

- Fleet repowering wave starts 2026 — monitoring gets rebuilt
- Grid codes tighten: automated reporting becomes mandatory
- Storage attach rate on new solar passed 40% in 2025
- Our storage product line is 18 months ahead of the pack

The plan

Series B of €24M funds the storage launch, US expansion and the self-serve tier — targeting €30M ARR by end of 2027.
